Who are those who have been sexually abused?

What works in preventing relapse?

Psychotherapy helps?

Treatment as those who engage in sexually abused on the "resistance" and mandated clients?

How can we effectively help the client change?

These are some of the questions that this unique workshop will answer the person talented presenter **David Prescott, on October 4, 2013, in Bucharest during the day of training.**

David Prescott is Director of Professional Development and performance optimization Beckett Center of New England, USA. Mr Prescott has over 30 years experience working (on average institutionalized and community programs) with people who have sexually abused. His interests training and clinical practice are focused on: increasing customer motivation, development and maintenance of the therapeutic relationship and assess progress in therapy. Mr Prescott has

published 11 books on sexual violence and has written numerous articles and chapters in books on topics such as assessment, treatment, motivation for change and build a better life.

Workshop on October 4, 2013 is a professional event born from the collaboration between ISTT and ARTS & CORS and addresses in particular psychologists specializing in clinical psychology, psychotherapy and counseling, applied psychology in national security, legal psychology, educational psychology, school counseling.

meaning broader workshop is of interest to professionals working directly or indirectly with people who have sexually abused (children, adolescents or adults) and are interested in understanding the behavior of these customers and finding ways to prevent recurrence.

Current knowledge will be introduced based on the study of the effectiveness of interventions specific about the behavior of sexually abused and what works in preventing relapses and their motivation for change. Participants will have the opportunity to acquire advanced communication skills to create and use a good relationship with the customers who sexually abused, or generally working with mandated clients or "resistant".

The participation fee is 150 € / person.

From Denial and Resistance to the Good Lives Model - What Professionals Need to Know about Sexual Offenders in Treatment

Perhaps the most surprising is That there is no "average" sexual offender, and that our Attempts to punish crimes rarely help people change Their Lives. This workshop content focuses on what we know and what we do not know about making our communities and safer sex by treating Aggression. It content focuses on what works in treatment and the best ways to sexually motivated offenders to change.
